Contingent Liabilities

Contingent Liabilities

Introduction

Contingent liabilities are conditional obligations that arise from past events that may require an outflow of resources embodying economic benefits based on the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the government. Contingent liabilities can be distinguished from the liabilities as these are conditional in nature and do not represent the present obligations of the government. Accordingly, a contingent liabilities are not recognized as liabilities regardless of the likelihood of the occurrence (or non-occurrence) of the uncertain future event.

The public debt analysis may be incomplete without reporting contingent liabilities. Contingent liabilities are not added to the overall debt of the country, however, such off-balance sheet transactions cannot be overlooked in order to gain a holistic view of a country's fiscal position and unveil the hidden risks associated with the obligations made by the government outside the budget. Therefore, it is imperative to examine the contingent liabilities in the same manner as a proposal for a loan, taking into account, inter alia, the credit-worthiness of the borrower, the amount and risks sought to be covered by a sovereign guarantee, the terms of the borrowing, justification and public purpose to be served, probabilities that various commitments will become due and possible costs of such liabilities etc.

Contingent liabilities of Pakistan are guarantees issued to Public Sector Enterprises (PSEs). The sovereign guarantee is normally extended to improve financial viability of projects or activities undertaken by the government entities with significant social and economic benefits. It allows public sector companies to borrow money at lower costs or on more favorable terms and in some cases allows to fulfill the requirement where sovereign guarantee is a precondition for concessional loans from bilateral / multilateral agencies to sub-sovereign borrowers.

Public disclosure of information about guarantees is an essential component of fiscal transparency, but it is more important to reflect the impact of financial risk associated with guarantees in the fiscal account. During first nine months of current fiscal year, the government issued fresh/rollover guarantees aggregating to Rs.104 billion, while, outstanding stock of government guarantees as at end March, 2016 amounted to Rs.663 billion. The share of rupee guarantees increased during past few years and accounted for 85 percent of the total guarantees stock as at end March 2016 owing to repayments made against foreign currency guarantees.

Table-1: Guarantees Outstanding as on March 31, 2016 (Rs. in billion)

Outstanding Guarantees extended to Public Sector Enterprises (PSEs)	**663**
-Domestic Currency	563
-Foreign Currency	100
Memo:	
Foreign Currency (US$ in million)	**958**

The volume of new government guarantees issued during a financial year is limited under Fiscal Responsibility and Debt Limitation Act 2005 which stipulates that the government shall not give guarantees aggregating to an amount exceeding 2 percent of the GDP in any financial year including those for rupee lending, rate of return, output purchase agreements and other claims and commitments provided the renewal of existing guarantees shall be considered as issuing a new guarantee. The limit of 2 percent of the GDP is applicable on guarantees issued both in local and foreign currencies. During July-March 2015-16, Government of Pakistan issued fresh/ rollover guarantees aggregating to Rs.104 billion or 0.4 percent of GDP (as shown in Table-2).

Table-2: New Guarantees Issued **(Rs. in billion)**

	2010	2011	2012	2013	2014	2015	2016*
New guarantees issued	224	62	203	136	106	156	104
(as percent of GDP)	1.5	0.3	1.0	0.6	0.4	0.6	0.4

*end March, 2016

Guarantees issued against commodity operations are not included in the stipulated limit of 2 percent of GDP as the loans are secured against the underlying commodity which are essentially self-liquidating and thus should not create a long term liability for the government. The quantum of these guarantees depends on the supply-demand gap of various commodities, their price stabilization objectives, volume procured, and domestic and international prices. The guarantees were issued against the commodity financing operations undertaken by TCP, PASSCO and provincial governments. As on March 31 2016, the outstanding stock against commodity operations was Rs.555 billion against the end-June 2015 position of Rs.675 billion.
