P R E F A C E

The Annual Budget Statement containing estimated Receipts and Expenditures for Financial Year 2019-20 is being tabled in the National Assembly of Pakistan and transmitted to the Senate of Pakistan as required under Article 80(1) and 73(1) of the Constitution of Islamic Republic of Pakistan.

The “**Explanatory Memorandum on Federal Receipts**” is being tabled along with the Annual Budget Statement, as additional information, in order to help the readers to understand the details of the receipts included in the Statement. In a structured manner, the major components of Federal resources have been explained, with a view to distinguish Revenue from Capital receipt and to further categorize Revenue Receipt as Tax and Non-Tax Receipt. A separate Chapter is introduced on External Resources with brief explanation, which has been further elaborated in a separate publication titled “Estimates of Foreign Assistance”. The mechanism for distribution of resources amongst the Provinces is also included with a brief over view of self-financing of their respective Annual Development Programmes.

With the aim of helping the readers to form a comprehensive view of the federal resources that have determined the formulation of the Budget for 2019-20, the nature of receipts has also been explained, wherever considered appropriate. I hope that this document would be useful for a comprehensive understanding of the Annual Budget Statement.

At Federal level, resources are generated through a well-coordinated and concerted effort by the revenue collecting agencies and other administrative units. The money so raised are properly deposited in the national exchequer, precisely accounted for and accurately reported as per the principles of financial propriety. The constitutional requirements for maintaining the federal receipts are strictly adhered to. Article 78(1) of the Constitution of Islamic Republic of Pakistan provides that all revenues received by the Federal Government, all loans raised by that Government and all moneys received by it in repayment of loan, shall form part of the Federal Consolidated Fund. Article 78(2) further provides that all other moneys received by or on behalf of the Federal Government shall be credited to the Public Account of the Federation. The major sources are Interest receipts, dividends, profits earned by various regulatory authorities. Moreover, various services provided by the government i.e social services, community services, economic services, defence services etc also yield revenue for the government.

1.4 In addition to Revenue Receipts, there are Capital Receipts reflected in Annual Budget Statement. Capital Receipts comprise Recoveries of loans and advances from Provincial Governments, local bodies, financial institutions etc. as well as Public Debt raised through various government securities.

1.5 Net proceeds of National Saving Schemes and net receipts from transactions under Deposits and Reserves head being Public Account Receipts, form part of Public Account of the Federation.

1.6 External Resources comprise project loans and grants, programme loans and other loans which are received from specialized financial institutions and friendly countries for specific development needs and budgetary requirements.

1.7 Federal Receipts may also be classified as Internal Receipts and External Receipts. Internal Receipts comprise Revenue receipts and Capital receipts. External Receipts comprise project aid, loans and grants.

7.4 Deposits and Reserves

7.4.1 The public account deposit receipts are broadly of two types known as (i) Reserve funds and (ii) Other deposits. The reserve funds, falling in the category of renewal reserve and depreciation funds, are designed to meet the cost of renewal and replacement of assets of the commercial departments and undertakings to which they relate. These are fed by annual contribution from these departments and organizations, calculated either on commercial principle or on ad-hoc basis. The expenditure on renewal and replacement in a year is initially booked as expenditure under the relevant capital head of account but at the end of the year, it is transferred to the appropriate depreciation or renewal reserve fund per contra-credit to the expenditure head.

7.4.2 Reserve funds and deposit accounts, other than the renewal reserve and depreciation funds, are intended to provide for liabilities and requirements of funds for specific purposes for which they have been created. Like renewal reserve and depreciation funds, these are fed by regular yearly payment or ad-hoc contributions from the current revenues. Such transfers generally pass through the budget grant of the concerned Ministry or Division.

7.4.3 The reserve funds and deposit accounts in respect of which provision for contributions have been made in the revised estimates for 2019-20 and budget estimates for 2020-21 are tabulated on the following pages.

7.4.4.3 Railways Reserve Fund

7.4.4.3.1 The objective of establishing this Fund is to secure the payment of annual contribution of general revenues to provide, if necessary, for arrears of depreciation and for writing off capital and to strengthen the financial position of the Railways. The Fund was also used for temporary borrowings for the purposes of meeting the expenditure for which there was no provision or insufficient provision in the revenue budget. The receipts in this Fund consist of the surplus which remains out of the profit of Railways after payment to general revenues of the contribution fixed under the Convention.

7.4.4.5.1 The federal government pays the difference of exchange rate fluctuations on behalf of borrowers, and charges an exchange risk fee. The rate of this fee is different for different foreign currencies.

Chapter 8:**EXTERNAL RESOURCES**

8.1 External Resources comprise Project Loans and Grants, Programme Loans and Other Loans. A brief description is given as under;

8.1.1 The aim and objective of seeking foreign or external financial assistance may be stated as "promoting economic and social development in the developing countries". It can also be defined as "Administered transfer of resources from a donor country or international agency to the developing countries with a view to encourage economic growth". Foreign Aid can be in the form of money, goods or technical assistance and can be between two (bilateral) or many (multilateral) countries/ institutions.

8.1.2 Foreign aid is also looked for to meet both economy's balance of payments gap and investment gap. That is why project and technical assistance alone are not sufficient. A large part of assistance is required in the shape of food and commodity aid. Project assistance does not simply finance import of capital goods and related services but also meets a part of local currency expenditure. Thus aid flow [project, programme and technical assistance] accompanied by commodity imports may generate counterpart local currency funds that are used to finance development expenditures.

8.1.3 In fact, many developing countries do not have sufficient funds to provide public goods such as education or transportation systems or clean water and waste disposal facilities. Although such goods are essential for development, their economic rate or return is so uncertain that private investors are unwilling to provide them on a large scale. Foreign aid can substitute for private capital in those instances, providing the funds for investment in public goods that the international capital market will not supply to those developing countries or would supply at a high interest rate. In principle foreign aid could be a major source of capital, fueling the growth of development countries and helping to promote economic and human development.

8.1.4 Foreign aid is good only if it is the result of financing investment in appropriate productive capacity. Increasing output allows debt and interest to be repaid. If the aid is used to finance current account deficits/ consumption, then there is no net investment and resultant future economic growth. Aid becomes a burden. It, therefore, entails an effective and efficient external debt management with the objective to ensuring that the government's.

8.1.5 Foreign aid is useful if utilized productively and efficiently otherwise developing countries are likely to face financial crises and are caught up in debt trap. The sequence of events could be as under:-

- a) As debt service liabilities rise without corresponding increase in revenue, the government would need to set aside increasing share of budgetary resources for debt services;
- b) The level of debt service would soon begin to affect routine government expenditure, often requiring additional borrowings to meet rising contractual payment obligations;

- c) The country would slowly slide into debt trap. More and more borrowings would be required to service the accumulated debt, creating a vicious circle; and
- d) The rising debt service obligations eventually lead to default i.e. the inability to honour principal and interest payments commitments.
- e) The default is generally followed by prolonged negotiations with the creditors individually or collectively [Paris Club/ London Club], leading to rescheduling/ restructuring/ write off the external debt. The relief programs generally include reform conditions to redeem government finances and put the economy back on the track.

Chapter 9: PRIVATIZATION PROCEEDS

9.1 Privatization in Pakistan is an important economic reform policy tool, for generating growth and to expunge structural inefficiencies, by removing false barriers and opening up the economy to competition. The Privatization program is part of the economic and structural reforms agenda of the Government of Pakistan that along with deregulation and good governance, seeks to enhance the growth and productivity of Pakistan's economy, by harnessing the private sector as its engine of growth. It takes an integrated approach, towards enhancing the private sector's role and goes beyond the transfer of public assets to the private sector, by identifying the linkages and role of regulation, good governance, market competition in fostering conditions that provide incentives for the private sector to invest in providing goods and services efficiently.

9.2 The Privatization Commission Ordinance, 2000 was promulgated on 28th September, 2000 to establish "Privatization Commission" for implementation of privatization policy of the federal government.

9.3 Section 16(2) of the said Ordinance envisages that the privatization proceeds shall be utilized by the Federal Government as follows:-

- (a) ten percent shall be used for poverty alleviation programmes ; and
- (b) the remaining ninety percent for retirement of the Federal Government debt

9.4 The estimates of privatization proceeds are given below:
