1 Introduction

- 1.1 Pakistan's economy has shown the strength to maintain the high economic growth momentum and absorb major shocks. Despite the tragic loss of life in the earthquake hit areas and surging international oil prices, the economy is expected to grow between 6.5 and 7% during 2005-06. The excellent performance of the economy during the last 4-5 years has led to creation of additional job opportunities and reduction in unemployment and poverty. The overall average annual growth rate of the economy over the previous four years was about 6 percent. This overall growth with exceptional performance of the agriculture sector during 2004-05 helped create incomes for the poor; thus beginning of a process to share this prosperity.
- 1.2 Expenditure data shows that government's commitment to provide resources for pro-poor sectors continued during this period. PRSP budgetary expenditure grew by 33.2% to Rs.166 billion during the first half of FY06.
- 1.3 Because of the sustainability in high economic growth and continuity in pro-poor expenditures, around 5.5 million additional jobs were created during the last two years. This resulted in reduction in the open unemployment rate from 7.7% in 2003-04 to 6.8% during the first quarter of 2005-06, according the latest Labour Force Survey. The preliminary results of the 2004-05 Pakistan Social and Living Standards Measurement Survey (PSLM) show a considerable decline in overall poverty, from 32.1% in 2000-01 to 25.4% in 2004-05 with rural poverty declining from 39% to 31.8% and urban poverty from 22.7% to 17.2% during the same period.
- 1.4 It is worth noting that with the completion of the CWIQ¹ component of the 2004-05 PSLM Survey, which is representative at the district level, the monitoring of PRSP indicators has entered into a new phase. Although the district-level data are only partially available, full results are likely to help monitor the progress in PRSP indicators at the lower administrative levels. These partial results show that few districts of the country have made a remarkable progress in primary school enrolment and also in reducing the gender gap. Some districts have been successful in providing full immunization to almost all eligible children. These good practices need to be highlighted and replicated in other districts in order to put the country on the path of progress and prosperity.
- 1.5 This progress report of the PRSP covers the second quarter of the current financial year, 2005-06. It has been divided into 8 sections. A review of economy is given in section 2. Budgetary and non-budgetary expenditures are discussed in section 3 and 4, respectively. Intermediate indicators are monitored in section 5. Special Programmes /schemes for poverty reduction are explained briefly in section 6, followed by a discussion on the performance of outcome indicators including poverty, school enrolment and child immunization in Section 7. Concluding remarks are given in the final section.

2 Review of Pakistan's Economy²

¹ CWIQ stands for Core Welfare Indicator Questionnaire.

² This section is based on 'Mid-Year Review of Pakistan's Economy', 27th February 2006, GoP, Finance Division, Economic Advisor's Wing, Islamabad.

2.1 Real GDP growth is originally targeted at 7% for FY06, which is not expected to meet its target as agriculture and industrial sector are expected to grow below the originally targeted levels. Key economic indicators for first half (H1) FY06 and same period in FY05 are given in table 1 and discussed in this section.

2.1 Agriculture

- 2.2 Area and production targets for cotton crop during the current fiscal year were 3.25 million hectares and 15.0 million bales, respectively. The crop was however, sown on the area of 3.124 million hectares- 3.8% less than the target and 2.2% less than last year (3.193 million hectares). The recent information indicates that size of the cotton crop may be in the range of 12.7 to 13.0 million bales or 8.9% to 11.0% less than last year. Factors responsible for the decline in cotton production include: excessive rain at the time of sowing, high temperature at flowering stage, late wheat harvesting resulting in decline in area under the crop production and pest attack in some cotton growing areas in Punjab and Sindh.
- 2.3 The sugarcane has been sown in the area of 0.900 million hectares 5.8% below the target and 6.8% less than last year. The sugarcane production for the FY06 is estimated at 40.1 million tons against the original target of 50.095 million tons and last year's achievement of 47.244 million tons. This sugarcane production is estimated to be lower by 15.1% over the last year. Factors responsible for the decline in sugarcane production include late harvesting of wheat, farmers shifting to other competing crops and frost affecting the crop. The current sugar crisis in the country has been caused by low production.
- 2.4 Rice production is estimated at 5.5 million tons, almost 9.5% higher than last year and 10% higher than the original target for the FY06.
- 2.5 Area and production targets of wheat a Rabi crop for the fiscal year 2005-06 are fixed at 8.415 million hectares and 22.0 million tons, respectively. The area under wheat crop sowing this year is higher by 1.6% (8.234 million hectares) compared with last year. Availability of water in sufficient quantity along with good price of crop last year was responsible for the increase in area sown.

2.2 Large Scale Manufacturing

2.6 Against the growth target of 14.5% for the FY06, Large Scale Manufacturing has grown at an average rate of 12% during the first five months (July-November) of this fiscal year. Textile and apparel, leather products, pharmaceuticals, chemicals, electrical goods and automobiles have registered high double- digit growth. The performance of petroleum group, engineering industries and non-metallic mineral products has been relatively weak. On the other hand, basic metal industries (the production of Pakistan Steel) and tyres and tubes have registered large negative growth. One of the coke oven batteries of the Pakistan Steel has been out of order since July 2005, causing Steel Mill to operate at around one-third of its capacity. Consequently production of basic metal industries has registered a decline of 60.3%. The production of tyres and tubes has registered a decline of 10.7% as manufacturing of cars are moving towards tubeless tyres.

2.3 Fiscal Developments

2.7 Fiscal deficit is targeted at 3.8% of GDP for the current fiscal year, which is slightly higher than the deficit level of the previous year (3.3% of GDP). Higher deficit was targeted to finance higher Public Sector Development Programme (PSDP), particularly towards financing infrastructure projects. Pakistan continues to maintain fiscal discipline. The overall fiscal deficit for the first half of current fiscal year stood at Rs 160.2 billion or 2.1% of the projected GDP for the year. Furthermore, fiscal deficit stood at 56.2% of full year deficit target of Rs 285 billion. The overall fiscal deficit excluding earthquake –related spending amounts to Rs 130.2 billion or 1.7% of the projected GDP or 45.7% of full year deficit target of Rs 285 billion. Total revenue for the first half amounted to Rs 498.4 billion as against Rs 423.8 billion in the same period last fiscal year, thus registering an increase of 17.6%.

Table 1: Key Economic Indicators

| | July-December July-December | | |

| Foreign Investment (US\$ Million) | 504 | 1462 | |

Source: Mid-Year Review of Pakistan's Economy (Feb 2006), GoP, Finance Division

2.4 CPI Based Inflation

2.8 Inflation during the first six months of the FY06 is estimated at 8.4% as against 8.8% in the same period last fiscal year. Food inflation is estimated at 7.5% as estimated against 12.6% in first half of FY05. The non-food, non-energy inflation which is also known as core inflation has also moved up and estimated at 7.6% as against 6.6% in the same period last half of fiscal year. Money supply grew by 7.97% during July-December FY06 compared to 9.83% during the same period of last fiscal year. House rent index has also played an important role in building inflationary pressures. Food inflation which was as high as 15.7% in April 2005 was brought down to 8.1% in December 2005. The sharp decline in food inflation in a short period of seven months provides ample evidence that Government's policy to liberalize import regime by allowing duty free import of wheat, wheat flour, livestock and other essential food items have been a success. Until December 15, 2005 the high prices of petroleum and the attendant rise in transport charges are measured against the frozen prices of petroleum products and

transport charges during May-December 15, 2004. The Government of Pakistan started raising the prices of petroleum products and transport charges started increasing accordingly after December 15, 2004, therefore, the gap in petroleum prices and transport charges between last and current years will start narrowing down with consequential decline in overall inflation rate.

2.5 Current Account Balance

2.9 Current account deficit excluding official transfers stood at US \$3.0 billion in the first half of the current fiscal year as against US \$0.83 billion in the same period last fiscal year. The sharp deterioration in the current account was mainly due to substantial increase in the trade deficit and deficit on the services account. Despite sizable export gains, the merchandize trade deficit widened to US\$ 5.58 billion in the first half of the current fiscal year. Exports in recent years have benefited from structural changes that have improved their competitiveness. However, rising oil bill and continued strength of non-oil imports owing to strong domestic demand have pushed imports higher, resulting in widening of trade gap. Worker's remittances totaled US\$ 2.0 billion during July-December FY05, as against US \$ 1.9 billion in the same period last year, showing an increase of 5.6%.

2.6 Foreign Private Investment

2.10 Total foreign private investment amounted to US\$ 1462.6 million during July-December FY06 as against US\$ 504.3 million in the comparable period of last fiscal year, thereby registering an increase of 190%.

2.7 Public Debt

2.11 During the first half of the current fiscal year, public debt stood at 55.7% of the projected GDP. In absolute terms public debt grew by a meager 2.9% during July-December FY06.

2.8 External Debt and Foreign Exchange Liabilities

2.12 As percentage of GDP, external debt and liabilities stood at 51.7% in end June 2000, declined to 36.7% in end June and further declined to 32.5% by end June 2005. It has further declined to 28.5% in end December 2005 for the projected GDP of FY06.

3 An Analysis of Pro-Poor Budgetary Expenditures

3.1 PRSP budgetary expenditures on 17 pro-poor sectors increased substantially by 33.2% to Rs 166 billion during the H1-FY06 over H1- FY05 (table 2). Largest proportion of PRSP budgetary expenditures has been spent on education sector. About 40% of PRSP expenditures were spent on education sector in H-1 FY05, whereas in H1-FY06 about 35% of PRSP expenditures were spent on the education sector. About 9% of total PRSP budgetary expenditures are made on health sector in H1-FY06. However, details of PRSP budgetary expenditures on education and health sector will be discussed later in this section.

Table 2: PRSP budgetary expenditures and % change between

Q2 FY2005-06 and Q2 FY2004-05

| | Expen | ditures | |
|-----------------------------|---------|-----------|--------|
| | • | ion Rs) | % |
| Sectors | | FY2005-06 | Change |
| Roads, highways & bridges | 9,630 | 13,946 | 44.8 |
| Water supply and sanitation | 2,160 | 3,665 | 69.7 |
| Education | 50,038 | 58,068 | 16.0 |
| Health | 12,274 | 14,915 | 21.5 |
| Population Planning | 1,567 | 2,871 | 83.2 |
| Social security & welfare | 1,989 | 2,085 | 4.8 |
| Natural Calamities | 242 | 8,487 | 3407.0 |
| Irrigation | 12,516 | 23,810 | 90.2 |
| Land reclamation | 1,076 | 971 | -9.8 |
| Rural development | 6,709 | 7,398 | 10.3 |
| Rural electrification | 371 | 969 | 161.2 |
| Food subsidies | 1,060 | 1,125 | 6.1 |
| Food Support Programme | 2,053 | 637 | -69.0 |
| Tawana Pakistan | 59 | 0 | -100.0 |
| Low cost housing | 229 | 172 | -24.9 |
| Administration of justice | 1,386 | 1,508 | 8.8 |
| Law and order | 21,322 | 25,428 | 19.3 |
| Total | 124,681 | 166,055 | 33.2 |

- 3.2 Largest increase in PRSP budgetary expenditures during H1-FY06 over H1-FY05 took place in natural calamities. Azad Jammu and Kashmir and eastern NWFP province faced widespread destruction due to October 8, 2005 earthquake of 7.6 magnitude. There was 100% increase in PRSP expenditures on natural calamities in NWFP province in H1-FY06 over H1-FY05 to Rs 7.5 billion, which is 88% of total PRSP budgetary expenditures on natural calamities. Excellent relief work was carried out in the earthquake-affected areas. Food, water, medical aid and shelter were provided to all the earthquake affectees, as a result there was no famine, no spread of epidemic and nobody froze to death due to non-availability of shelter in the earthquake affected areas. As these areas were demonetarized, Rs 25,000 were given to everyone who had lost a house, Rs 50,000 were given to an amputee or physically despaired patient, Rs 100,000 were given to the next of kin of anyone who had died. Reconstruction and rehabilitation of the earthquake-affected areas is underway, which is aimed to be as successful as the relief operation.
- 3.3 The proportion of PRSP budgetary expenditures made on irrigation stood at 14% during H1-FY06. There was an increase of 90% to Rs 23.8 billion in expenditures made on irrigation sector in H1-FY06 relative to the same period in FY05. About 76% of the expenditure made on irrigation sector was development expenditure and hence will increase agricultural productivity and also bring prosperity in rural areas.
- 3.4 There was a substantial increase of 161% to Rs 969 million on rural electrification in H1-FY06 over H1-FY05. Expenditures made on roads highways and bridges during H1-FY06 relative to H1-FY05 increased by 45% to Rs 13.9 billion of which 80% comprise development expenditures. During the same period expenditures

made on water supply and sanitation increased by 69.7% to Rs 3.7 billion, of which 70% comprised of development expenditures. Large increases in PRSP budgetary expenditures were observed in population planning in H1-FY06. During the same period rural development, food subsidies, law and order and administration of justice witnessed increase in expenditures.

3.5 Sectors, which observed a decline in expenditures made on them during H1-FY06 over H1-FY05, include land reclamation, Food Support Programme, low cost housing and Tawana Pakistan.

3.1 PRSP Budgetary Expenditures by Province and Sectors

- 3.6 Percentage change in PRSP budgetary expenditures made by the Federal Government and provinces during H1-FY06 over H1-FY05 is given in Table 3. Largest proportion of PRSP budgetary expenditures were made by Punjab province (36%), followed by Federal Government (25%), Sindh (18%), NWFP (14%) and Balochistan (7%). Largest increase (83%) in the PRSP budgetary expenditures during H1-FY06 over the same period in FY05 was witnessed in NWFP province to Rs 23 billion, caused primarily by expenditures made on natural calamities, owing to October 8, 2005 earthquake as discussed earlier.
- 3.7 More than 100% increase in PRSP budgetary expenditures by the Federal Government during H1-FY06 relative to H1-FY05 was witnessed in population planning, natural calamities, irrigation and rural electrification. During the same period an enormous increases in expenditures made by Punjab province took place in water supply and sanitation of which 88% expenditure was development, indicating that Punjab Government is giving priority to this sector, provision of which improves living condition and health. Except for land reclamation, food support programme and low cost housing, all remaining sectors in Punjab province witnessed increase in H1-FY06 over H1-FY05. Sindh province witnessed increase in PRSP budgetary expenditures in most of the sectors, except rural development, food subsidies and food support programme. In Sindh province there was an increase of 41% to Rs 30 billion in PRSP expenditures made during H1-FY06 relative to the same period in FY05. During the same period Baloachistan province observed an increase of 23% to Rs 11 billion in PRSP budgetary expenditures. Largest increase in expenditures was seen in natural calamities in Balochistan, whereas increases were also witnessed in roads, highways & bridges, education, health, population planning, social security &welfare, irrigation, rural development, administration of justice and law & order.

| Total | 50.9 | 10.9 | 41.4 | 83.1 | 22.5 | 33.2 |

3.2 PRSP Expenditures on Sub-Sectors of Education and Health

- 3.8 As mentioned earlier, largest proportion (35%) of PRSP budgetary expenditures were spent on education sector during H1-FY06. During the same period in FY05, 40% of total PRSP budgetary expenditures were made on education sector. During H1 FY06 education expenditure increased by 16% to Rs 58 billion (table 4). Increase in education sector expenditure was observed in Sindh, NWFP, Balochistan and Federal Government. Punjab province witnessed a slight decline of 0.6% to Rs 26 billion in education expenditure incurred during H1-FY06 over H1-FY05. However, largest proportion of total education expenditures (45%) was made in Punjab province in H1-FY06.
- 3.9 Education expenditure made by the Federal Government and Punjab province increased in all sub- sectors of education except other educational institutions during H1-FY06 over H1-FY05 (table 4). There was an exceptionally large increase of 821% to Rs 1.5 billion in expenditures made on professional/technical universities by the Federal Government during first half of FY06 as compared to the first half of FY05. Sindh province showed an increase in education expenditure in all sub-sectors during the same period. In NWFP province education expenditure declined in professional and technical universities and other educational institutions, whereas, remaining sub-sectors witnessed large increases. In Balochistan province education expenditure increased significantly in primary education, secondary education, university/ college education, professional/technical universities and other educational institutions during H1-FY06 compared to H1-FY05. During the same period a decline of 7% was seen in expenditure made on teacher and vocational training in Balochistan province.

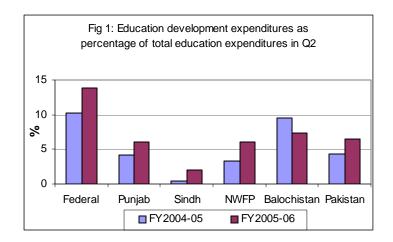

Table 4: Percentage change in PRSP education expenditures between Q2 FY2005-06 and Q2 FY2004-05 by province and sectors of education

| | • | | | | | Teacher | |

| Punjab | -0.6 | 21.2 | 37.2 | 17.2 | 62.0 | 9.7 | -81.8 |
| Sindh | 36.1 | 22.7 | 34.3 | 37.3 | 47.0 | 53.3 | 150.6 |
| NWFP | 27.1 | 36.8 | 20.5 | - | -48.4 | 36.4 | -24.3 |
| Balochistan | า 36.1 | 32.9 | 31.0 | 45.8 | 35.7 | -6.5 | 48.9 |
| Pakistan | 16.0 | 24.6 | 29.3 | 117.4 | 82.6 | 13.4 | -55.8 |

- 3.10 Government of Pakistan aims to achieve universal primary education by 2015. To achieve this goal largest proportion of education expenditure (44%) to Rs 25.7 billion was spent on primary education in H1-FY06, which is also 3 percentage points higher than proportion of education expenditure made on primary education in H1-FY05. Second priority in education sector is given to secondary education where 28% of education expenditure at Rs 16.4 billion was made in H1-FY06. During H1-FY05 about 25% of education expenditure were made on secondary education. Proportion of education expenditure made on university/college education, professional/technical universities increased to 12.2% and 5.4%, respectively in H1-FY06 compared to H1-FY05), remained same on teacher and vocational training at 1.6% and declined by 13.5 percentage points to 8.3% on other educational institutions (table 5).
- 3.11 During H1-FY06, Federal Government spent largest proportion (37.3%) of education expenditures on university/collage education, whereas in H1-FY05 it had spent largest proportion (58%) of education expenditure on other educational institutions to Rs 3.6 billion. All provinces spent largest proportion of their education expenditures on primary education, Punjab 56.5%, Sindh 41.5%, NWFP 48.6% and Balochistan 32.5% during H1-FY06. All provinces spent second largest proportion of education expenditures on secondary education, Punjab 26.3%, Sindh 34.3%, NWFP 39.6% and Balochistan 28.3% during the same period. Federal Government, Sindh, NWFP and Balochistan spent smallest proportion of their education expenditures on teacher and vocational training during H1-FY06, whereas Punjab made smallest education expenditures on professional/technical universities.
- 3.12 Figure 1 shows that overall education development expenditure as percentage of total education expenditure increased by 2 percentage points to 6.4% in H1-FY06 over H1-FY05. During the same period, proportion of education development expenditure increased to 6.1% in Punjab, 2.1% in Sindh, and 6.1% in NWFP, whereas it declined to 7.3% in Balochistan. Federal Government spent largest proportion of education development expenditure (13.8%) at Rs 1.2 billion as compared to all provinces in H1-FY06.

Table 5: Percentage distribution of education expenditures in Q2 FY2005-06 and Q2 FY2004-05 by province and sectors of education

| Province/region | All sectors | Primary Education | Secondary Education | University/ Education | Professional CollegeTechnical Universities | |
|-----------------|-------------|----------------------|------------------------|--------------------------|--|--------------|
| | | | | | | Q2 FY2004-05 |
| Federal | 100.0 | 11.3 | 19.4 | 8.7 | 2.6 | 0.0 |
| Punjab | 100.0 | 46.3 | 19.1 | 6.8 | 1.1 | 2.7 |
| Sindh | 100.0 | 46.0 | 34.8 | 8.7 | 4.7 | 0.5 |
| NWFP | 100.0 | 45.1 | 41.8 | 0.0 | 10.7 | 0.2 |
| Balochistan | 100.0 | 33.3 | 29.4 | 6.8 | 6.1 | 2.2 |
| Pakistan | 100.0 | 41.2 | 25.4 | 6.5 | 3.4 | 1.6 |
| | | | | | | Q2 FY2005-06 |
| Federal | 100.0 | 11.0 | 14.3 | 37.3 | 3 17.5 | 0.2 |
| Punjab | 100.0 | 56.4 | 26.3 | 8.0 | 1.8 | 3.0 |
| Sindh | 100.0 | 41.5 | 34.3 | 8.8 | 5.1 | 0.6 |
| NWFP | 100.0 | 48.6 | 39.6 | 5.9 | 4.4 | 0.2 |
| Balochistan | 100.0 | 32.5 | 28.3 | 7.3 | 6.1 | 1.5 |
| Pakistan | 100.0 | 44.3 | 28.3 | 12.2 | 5.4 | 1.6 |

3.13 Table 6 shows that there was an increase of 21.5% in health expenditure to Rs 14.9 billion during H1-FY06 over H1-FY05 (annex 1). During the same period a double-digit growth in health expenditure was observed in expenditure made by the Federal Government, Punjab, Sindh and Balochistan. NWFP witnessed a very small increase of 3.5% in health expenditures to Rs 1.6 billion. Punjab has the largest share (40%) in total health expenditures, followed by Federal Government (28%) in H1-FY06. An overall increase in expenditures on all sub-sectors of health was seen in H1-FY06 relative to H1-FY05.

3.14 Increase in expenditure on general hospitals and clinics was seen in all regions, with most notable increase (74%) by the Federal Government to Rs 2.4 billion. Increase in expenditure on mother and child in H1-FY06 relative to H1-FY05 took place in Punjab, NWFP, Balochistan and Federal Government (annex 1). No expenditures were made on mother and child in Sindh province in H1-FY05, as well as H1-FY06. Increase in expenditure made on health facilities and preventive measures occurred in Sindh and expenditures made by the Federal Government, whereas decline was witnessed in Punjab, NWFP and Balochistan There was an enormous increase of 52.7% in expenditure made on other health facilities in Balochistan to Rs 345 million in H1-FY06 over H1-FY05.

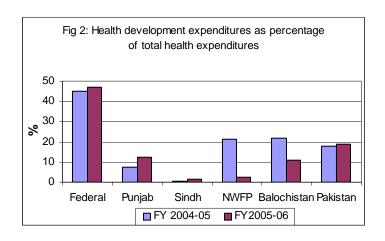

Table 6: Percentage change in PRSP health expenditures between Q2 FY2005-06 and Q2 FY2004-05 by sectors

| Province/ | | General Hospital and | Mother | Health Facilities and Preventive | Other Health |
|-------------|--------------|----------------------------|---------|---|-----------------|
| region | Total Health | Clinics | & Child | Measures | Facilities |
| Federal | 37.5 | 5 74.0 | 0- | 9. | 7 -10.6 |
| Punjab | 15.2 | 2 17.: | 2 13.0 | -36. | 8.7 |
| Sindh | 30.2 | 2 29. | 7- | 32. | 9 32.0 |
| NWFP | 3.5 | 5 11. | 7 33.3 | 3 -1.3 | 3 -40.1 |
| Balochistan | 16.0 |) 19. | 3- | -35.0 | 52.7 |
| Pakistan | 21. | 5 27. | 6 27.6 | 5.5 | 3 7.3 |

- 3.15 Largest proportion of health expenditure 74.9% was made on general hospital and clinic in H1-FY06, 13.3% was made on health facilities and preventive measure, 11.5% on other health facilities and a negligible proportion (0.2%) on mother and child. The distribution of health expenditure was somewhat similar in H1-FY05. Except for Balochistan, all regions spent largest proportion of health expenditure on general hospitals and clinics. Balochistan spent 44.1% of health expenditure on other health facilities.
- 3.16 Figure 2 shows that health development expenditure increased slightly by one percentage point to 19% of total health expenditure in H1-FY06 over H1-FY05. Health development expenditure by the Federal Government stood at 47.2% at Rs 1.9 billion in H1-FY06 and 44.9% at Rs 1.3 billion in H1-FY05, which is very encouraging. There was an increase of 4.9 percentage points in health development expenditure in Punjab to 12.2%, amounting to Rs 721 million. A decline in health development expenditure was seen in NWFP and Balochistan in H1-FY06 compared to H1-FY05. Sindh province spent a nominal proportion of health expenditure for development, which needs to be increased to expand provision and access to health services in the province.

Table 7: Percentage distribution of health expenditures in Q2 FY2005-06 and Q2 FY2004-05 by province and sector

| | | General Hospital | | Health Facilities and | Other |

4 Non-Budgetary Transfers

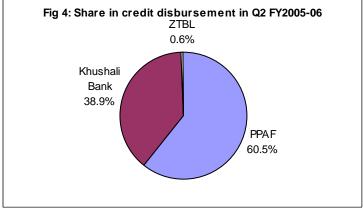

- 4.1 Non-budgetary transfers comprise of transfers from Zakat, Employees' Old-Age Benefit Institutions (EOBI) and micro credit (table 8). Non-budgetary transfers increased considerably by 47.3% to Rs 3.7 billion during Q2 FY06 compared to Q2 FY05. During the same period, number of beneficiaries increased by 119% to 569 thousand.
- 4.2 Amount of zakat disbursed during Q2 FY06 stood at Rs 922 million, witnessing a decline of 19% compared to Q2 FY05; this decline in zakat disbursement is attributed to non-availability of data from Balochistan province. During the same period, total zakat beneficiaries increased by 3% to 405 thousand, of which 41% are female beneficiaries.
- 4.3 Disbursement through EOBI increased by 49% to Rs 730 million during Q2 FY06 over Q2 FY05. Out of total EOBI disbursement in Q2 FY06, 99% consisted of pension and remaining 1% consisted of grants.
- 4.4 Micro credit disbursement increased by 134% to Rs 2 billion during Q2 FY06 relative to the same period in FY05. During the same period total beneficiaries increased by 116%to 165 thousand, of which 68.7% were male beneficiaries and 31.3% were female beneficiaries. Share of Khushali Bank in micro credit disbursement was 56.4% in Q2 FY05, which has declined to 38.9% in Q2 FY06. The decline in micro credit disbursement share of Khushali Bank is the result of increase in micro credit disbursement share of Pakistan Poverty Alleviation Fund (PPAF) to 60.5% in Q2 FY06, an increase of 18 percentage points from Q2 FY05. Zarai Taraqiati Bank Limited (ZTBL) has the smallest share in credit disbursement, which declined from 1.2% in Q2 FY05 to 0.6% in Q2 FY06.
- 4.5 Credit disbursed through partner organizations of PPAF increased quite substantially by 234% to Rs 1.2 billion in Q2 FY06 compared to Q2 FY05, average credit disbursement of PPAF stood at Rs 13,453 in Q2 FY06. During the same period total beneficiaries increased by 227.6% to 90.9 thousand. Though number of male beneficiaries is 1.3 times more than the female beneficiaries in Q2 FY06, but growth in female credit beneficiaries is 250% more than male credit beneficiaries compared to the same period in Q2 FY05. PPAF extended its operation to 2 more districts during Q2 FY06, covering 81 districts of Pakistan during Q2 FY06.

| | Total beneficiaries | 467,900 | 569,589 | 119 |

^{*} Excluding data for Balochistan for Q2 FY2005-06 due to non-availability, hence a decline in disbursement ** Availability of Balochistan zakat data will increase the values.

5 Monitoring the PRSP Intermediate Indicators

5.1 For the second quarter of FY06, data for education and health intermediate indicators are available. These indicators have been discussed in this section.

5.1 Functional Schools

Number of functional public primary and middle schools for 2004-05 are reported in table 9. Mosque schools are also included in functional public schools. Data of functional public schools for 2004-05, reported in PRSP annual progress report FY2004-05 was estimated and not actual. Total number of primary and middle schools together stood at 141,186 in 2004-05, of which 90% are primary schools and remaining 10% are middle schools. Punjab being the largest province on population basis also has the largest number of functional public schools, which comprise 40% of total functional public schools in Pakistan. Percentage of functional public schools situated in Sindh, NWFP, Balochistan, AJK, FANA, FATA and Islamabad stood at 26%, 17%, 7.8%, 3.6%, 1%, 3.3% and 0.19%, respectively. By using this very simple indicator of the functional school, it is hard to access the progress unless more regular data is made available.

Table 9: Number of Functional Public Schools for

| 2004-05 | | |
|-----------------|----------------|---------|
| Province/Region | Primary Middle | Total |
| Punjab | 50,268 7,174 | 57,442 |
| Sindh | 34,633 2,104 | 36,737 |
| NWFP | 22,024 2,385 | 24,409 |
| Balochistan | 10,282 772 | 11,054 |
| AJK | 4,053 1,032 | 5,085 |
| FANA | 1,253 223 | 1,476 |
| FATA | 4,318 402 | 4,720 |
| Islamabad | 209 54 | 263 |
| Pakistan | 127,040 14,146 | 141,186 |
| | | |

Note: Mosque schools are included in primary schools

5.2 Posts Filled Against Sanctioned Posts in Public Schools

5.3 Posts filled against sanctioned posts in primary and middle schools for males and females for provinces and regions are given in table 10. Percentage of posts filled against sanctioned posts at the primary level is higher than the middle level in all provinces and regions. A close look at the table shows no correlation between the percentage of posts filed in and school type (for male or for female).

Note: Mosque teachers are included in primary teachers

5.3 Trained Teachers in Public Schools

Percentage of trained male and female teachers in public schools at primary and middle level for 2004-05 are given in table 11. The quality of education imparted in an educational institution depends mainly on the competence of the teachers. There are 100% trained teachers in public schools at primary and middle level in Punjab, NWFP and FANA, indicating that quality of education imparted in these areas is completely satisfactory. The gaps in percentage of trained teachers in public schools in remaining areas are though small but there is a need to fill them to further improve the quality of education in public schools in these areas.

Table 11: Percentage of Trained Teachers 2004-05

5.4 Basic Facilities in Public Schools

5.5 Proportion of public schools with basic facilities (water, latrine, electricity and B-Wall) in 2004-05 is given in table 12. Proportion of public schools with basic facilities is quite dismal in Pakistan, all provinces and regions, except Islamabad. There is a need to increase development education expenditure to provide basic facilities in public schools.

Table 12: Proportion of Public Schools with Basic Facilities in 2004-

5.5 TT-Immunization Coverage

Data on TT-immunization coverage for pregnant women are presented in table 5.6 13. TT-1 immunization coverage of target population increased by 2 percentage points to 41% in Q2 FY06 as compared to Q2 FY05. TT-2+ immunization coverage of target population increased by 4 percentage points to 47%, during the same period. Regional variation of TT- immunization coverage has been very large. Largest coverage of TT-1 and TT-2+ immunization coverage took place in FATA in Q2 FY06 as well as Q2 FY05. There was an increase of 3 percentage points in TT-1 immunization coverage to 55% and 10 percentage points increase in immunization coverage of TT-2+ to 73% in Q2 FY06 over Q2 FY05 in FATA. For TT-1 immunization coverage, there was an increase of 9 percentage points in Sindh, 21 percentage point in NWFP, 1 percentage point in Balochistan, 5 percentage points in FANA in Q2 FY06 over Q1 FY05. Whereas, a decline in TT-1 immunization coverage during the same period was observed in Punjab, AJK, ICT and CDA. TT-2+ immunization coverage increased by 1 percentage point in Punjab, 9 percentage points in Sindh, 24 percentage points in NWFP and 18 percentage points in FANA during Q2 FY06 over Q2 FY05. A decline in TT-2+ immunization coverage was seen in Balochistan, AJK, ICT and CDA during the same period.

6 Special Programmes/Schemes for Poverty Reduction

6.1 Two poverty reduction programs, Khushal Pakistan Programme-I (KPP-I) and Pakistan Bait-ul-Mal are discussed briefly under this section.

6.1 Khushal Pakistan Programme-I

- 6.2 Table 14 presents the number of schemes approved under each category for KPP-I during Q2 FY06. A total of 1,174 schemes were approved under KPP-I during Q2 FY06, of which 404 were for road, 390 for electrification, 38 for gas, 27 for education, 9 for health, 227 for water supply, 77 for sanitation and 2 for bulldozers. Largest number of KPP-I schemes (478) was approved in Punjab province. KPP-I schemes approved for Sindh, NWFP and Balochistan stood at 157, 294 and 67, respectively. KPP-I schemes implemented in Q2 FY06 provided temporary employment to 73,575 people and benefited 532,260 people.
- 6.3 During Q2 FY05, a total of 598 schemes were approved under Tammer-e-Pakistan Programme (TPP), of which 381 were for road, 46 for sanitation, 59 for education and 102 for water supply. TPP schemes generated 405,584 temporary employments during Q2 FY05.

6.2 Pakistan Bait-ul-Mal Programmes

- Many programmes targeting the poor are implemented through Pakistan Bait-ul-Mal (PBM), see table 15 Total disbursement under all projects declined by 13.9% to Rs 832 million during Q2 FY06 compared to the same period in FY05. There was a decline of 22.4% to 581,427 households who benefited from PBM schemes during the same period.
- 6.5 Food Support Programme (FSP) is the largest programme of PBM, targeting poorest of the poor to provide relief to the increase in the wheat prices since year 2000. Total disbursement under FSP declined by 26.1% to Rs 639 million in Q2 FY06 relative to Q2 FY05 (table 16). During the same period number of households benefiting from FSP declined by 26.1% to 532,904. In Sindh province, there was an increase of 98% in FSP disbursement to 172 million in Q2 FY06 over Q2 FY05, the remaining provinces and regions observed decline in FSP disbursement.
- 6.6 In the remaining projects of PBM, an increase was observed in disbursements as well as number of households benefiting from the projects in Q2 FY06 over Q2 FY05. During the same period increase in disbursement recorded for Individual Financial Assistance stood at 75% at Rs 103 million. There was an increase of 5.4% to Rs 30 million in disbursement under National Centres for Rehabilitation of Child Labour during the same period. There was an increase of 237% to Rs 17 million in disbursement under Vocational Training Centres in Q2 FY06 over Q2 FY05. Largest increase in PBM disbursement (357%) of Rs 42 million took place under Institutional Rehabilitation (Grant in aid to NGOs) during the same period.

7 Monitoring of Outcome Indicators

7.1 Poverty

7.1 Since the initiation of the PRSP process in 2001-02 it is first time that the results of a representative household survey, PSLM 2004-05, regarding the incidence of poverty are available. The Planning Commission is the designated agency to estimate poverty based on the official poverty line. Using the consistent methodology, it has been estimated that poverty in Pakistan which increased rapidly in the 1990s, and the rising trends continued until 2001-02, has declined by 6.7 percentage point between 2001-02 and 2004-05. Table 17 shows that poverty has declined from 32.1% in 2000-01 to 25.4% in 2004-05. This decline has been witnessed in rural as well as urban areas of the country. In urban areas, the incidence of poverty reduced from about 22.7% in 2000-01 to 17.2% in 2004-05. In rural areas, it declined to around 32% in 2004-05 compared to 39% in 2000-01. The 7-percentage point reduction in rural poverty has narrowed the urban-rural gap in the level of poverty. It indicates an improvement in the overall well-being of both urban and rural residents.

| Та | Table 17: Incidence of Poverty | | | | | | | | | | |
|---------|--------------------------------|---------|------------|--|--|--|--|--|--|--|--|
| Region | 2001-02 | 2004-05 | Difference | | | | | | | | |
| Overall | 32.1 | 25.4 | 6.7 | | | | | | | | |
| Urban | 22.7 | 17.1 | 5.6 | | | | | | | | |
| Rural | 39.0 | 31.8 | 7.2 | | | | | | | | |

7.2 The Planning Commission uses the calorie intake approach to compute the poverty line, which takes into account both food and non-food expenditures including health, education, housing, transport, recreation etc. It is worth reporting changes in household consumption expenditure between the two survey periods. The results of the 2004-05 PSLM show an increase in average household expenditure by 36% between the 2000-01 and 2004-05 period. The increase in per capita expenditure during the same period is more than 40% (Table 18). After adjusting for inflation, the real expenditure in household and per capita terms increased by 15% and 19% respectively. Although, according to the PSLM, the increase in consumption expenditure is relatively higher among rich families, the poorest households (lowest 40%) have also shown a considerable increase in their expenditure in real terms.

7.2 Unemployment

7.3 The 2005-06 Labour Force Survey is designed to generate data on employment situation representative for each quarter as well as for the whole year. The first quarter data (July-September, 2005) shows the unemployment rate as 6.8%, which is lower than the rate of 7.7% in 2003-04 (Figure 5). As noted earlier, over the past two years, 5.5 million jobs had been created. This has led to reduction in overall unemployment rate.

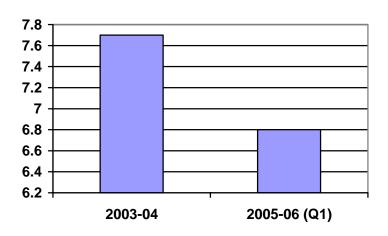

Fig 5: Change in Unempoyment Rate

7.3 Primary Enrolment

- 7.4 In the 2004-05 Annual Report of the PRSP, the results of the PSLM 2004-05 concerning primary education, literacy and immunization were reported and discussed at the national and province levels. The PSLM has a unique feature of generating data representative at the district level. Whereas the complete district-wise report on social sector based on the PSLM findings is yet to be launched, partial results on some districts with highest achievements in primary enrolment and immunization have so far been compiled. The relevant data have been reported in Table 19.
- 7.5 Panel A of the Table 19 shows data on gross primary enrolment for high achieving districts. The overall gross enrolment rate (GRE) at the primary level has increased from 72% in 2001-02 to 86% in 2004-05. Four districts where GRE is 100 or even more than 100 are: Narrowal in Punjab, Karachi in Sindh, Abbottabad in NWFP and Ketch/Turbat in Balochistan. The GRE is computed as the ratio of children enrolled in primary classes (1-5) to total children aged 5-9 years. When GREs exceeds 100, it shows that children older than 9 years have been admitted in primary classes. It also shows that in these high achieving districts, steps have been taken to enhance the school enrolment by attracting children aged more than 9 years.
- 7.6 Panel B of Table 19 shows that the overall net enrolment rate (NER) has increased from 42% in 2001-02 to 52% in 2004-05. NER refers to the ratio of 5-9 years old children enrolled in primary level to all children aged 5-9 years. Panel B shows that Sialkot, Karachi, Abbotabad and Ketch/Turbat are those districts where NER is considerably higher than the national average. In these four districts it varies between 63 and 84.

7.7 One encouraging element is very low gender gap in GER and NER in Abbottabad, Sialkot and Karachi. In fact, there is no real difference in male and female NERs.

7.4 Literacy

7.8 The overall adult (10 year and older) literacy rate has increased from 45% in 2001-02 to 53% in 2004-05. The highest literacy was found in the following four districts: Rawalpindi (75%), Karachi (78%), Abbottabad (65%) and Quetta (65%). However, in these districts, a considerable gender gap exists in adult literacy. In Rawalpindi and Karachi the gap was 20%. It was 33% and 27% respectively in Quetta and Abbottabad. Spread of adult female literacy programs at a large scale particularly in rural areas seems to be the solution to fill gender gaps in literacy.

8 Concluding Remarks

8.1 This report has analyzed the PRSP progress in input, intermediate and outcome indicators for the first half of FY06. A review of the economic performance indicates that despite severe earthquake and rise in international prices of oil, momentum in economic growth is expected to be continued. Steps have also been taken to control the inflation. The pro-poor expenditures on the identified sectors have shown a considerable increase during the first half of FY06. In addition to relief work in the earthquake hit areas, education, health and irrigation are the priority sectors for public expenditures. It is

encouraging to see that all provinces have assigned high priority to primary education in terms of expenditure to achieve the target of universal primary schooling.

- 8.2 Credit disbursement through PPAF and Khushhali Bank has increased, and a considerable proportion of the beneficiaries are females. Credit is likely to assist poor, particularly transitory poor to move out of the poverty trap.
- 8.3 In education sector, the proportion of functional schools, posts filled in and training of public school teachers are satisfactory. However, basic facilities at schools including drinking water, toilet and boundary walls are available in small proportion of primary schools. To enhance child enrolment, particularly for girls, all schools may be provided these basic facilities.
- 8.4 Poverty, which increased during the 1990s and rising trends continued until 2000-01 has considerably declined. Unemployment rate has also come down. These positive outcomes suggest the success of government policies to improve the well-being of its citizens. Success of few districts in achieving the high levels of net primary-school enrolment and literacy suggests for replication of these success stories to other districts of the country, which lacks behind in achieving the social sector goals.
