Chapter 9

PUBLIC DEBT

9.1 Introduction

The primary objective of public debt management is to ensure the Government's gross financing requirements are met at the lowest possible cost over the medium to long run, consistent with a prudent degree of risk.

The conduct of public debt management varies across sovereigns due to different institutional setup, macro-dynamics, behaviour of economic fundamentals, legal frameworks, and governance structures. Nevertheless, the goal is to ensure that both the level and rate of growth in public debt is fundamentally sustainable while safeguarding that the debt portfolio is efficiently structured in terms of currency composition, maturity profile, and interest rates while also ensuring prudent levels of contingent liabilities.

There are various factors that causes to increase public debt. These factors include: (i) fiscal deficit; (ii) exchange rate movements; and (iii) change in Government cash balance. Besides these, the conduct of monetary and fiscal policies also impacts the sustainability of public debt. Hence, it is important to acknowledge the role of macroeconomic policies in debt sustainability, keeping in mind that the overall net gains of macroeconomic policy should be positive.

Public debt portfolio and borrowing operations witnessed various developments during first nine months of ongoing fiscal year (Jul-Mar FY23) as highlighted below:

- Financing of fiscal deficit was solely carried out through domestic markets;
- Within domestic debt, the Government relied on long-term domestic debt securities (predominantly on: (i) floating rate Pakistan Investment Bonds i.e., PIBs and, (ii) Sukuk) for financing of its fiscal deficit and

repayment of debt maturities. The Government was able to retire Treasury Bills (T-bills) amounting to Rs 522 billion which led to a reduction of short-term maturities;

- The Government repaid Rs 310 billion against its debt owed to State Bank of Pakistan (SBP). The cumulative debt retirement against SBP debt stood at Rs 2.0 trillion since July 2019;
- In addition to existing 5 year Ijara Sukuk instrument, Government introduced 3 year and 1 year Ijara Sukuk instruments in January 2023 and February respectively. The target is to diversify shariah compliant instrument base, give more options to investors with appetite towards Islamic investments and fulfil Government's financing requirements. Government successfully issued Shariah Compliant Sukuk instruments amounting to around Rs. 401 billion:
- Within external debt, inflows from multilateral sources and foreign commercial banks remained major sources of gross external inflows. Under 7th and 8th review of the International Monetary Fund (IMF) program, US\$ 1.166 million were disbursed. while US\$ 1,500 million was received from Asian Development Bank under the 'Building Resilience with Active Countercyclical Expenditures (BRACE) program. Asian Infrastructure Investment Bank (AIIB) co-financed the BRACE program to the tune of \$ 500 million. In addition, \$ 1,900 million loans from commercial banks were also refinanced;
- Government rolled-over US\$ 3,000 million deposits each from China and Saudi Arabia which were utilized towards budgetary support;

- Saudi oil facility amounting to around US\$ 900 million was utilized (around US\$ 100 million each month);
- Government repaid international commercial loans to the tune of US\$ 5,541 million, out of which US\$ 4,541 million were bank loans, whereas US\$ 1,000 million was international Sukuk maturity.

9.2 Public Debt

Fiscal Responsibility and Debt Limitation (FRDL) Act 2005 defines "Total Public Debt" as debt owed by Government (including Federal Government and Provincial Governments) serviced out of consolidated fund and debts owed to the International Monetary Fund. Table 9.1 presents the trend of total public debt.

Table 9.1: Total Public Debt	Table 9.1: Total Public Debt(Rs in billion)							
	Jun-13	Jun-18	Jun-19	Jun-20	Jun-21	Jun-22	Mar-23

As per Fiscal Responsibility and Debt Limitation Act, 2005 amended in June 2017, "Total Debt of the Government" means the debt of the Government (including the Federal Government and the Provincial Governments) serviced out of the consolidated fund and debts owed to the International Monetary Fund (IMF) less accumulated deposits of the Federal and Provincial Governments with the banking system.

Note: PBS has changed the National Accounts base year from 2005/06 to 2015/16. The new GDP numbers are available from 1999-2000 (updated in May 2023)

Source: State Bank of Pakistan and Debt Management Office, Ministry of Finance

Apart from financing of fiscal deficit, the depreciation of Pak-Rupee vis-a`-vis US Dollar by around 39 percent led to significant increase in the stock of external public debt when converted into Pak-Rupee. The main factors

behind the increase in total public debt during first nine months of ongoing fiscal year vis-à-vis corresponding period of last year are presented in Table 9.2.

9.4 Servicing of Public Debt

Interest expense was recorded at Rs. 3,582 billion during the first nine months of the current fiscal year against its annual budgeted estimate of Rs. 3,950 billion. Interest expense on domestic debt was recorded at Rs. 3,107 billion, which is 64 percent higher as compared to interest expense on domestic debt in same period of preceding year. The main reasons for increase are:

i. High cost of borrowing on new domestic debt and resetting of existing floating rate debt at higher rates (around 70 percent of domestic debt is floating rate) due to frequent upward policy rate revisions in wake of rising inflation; and

ii. Less than envisaged external inflows which exerted additional pressure on domestic sources for financing of fiscal deficit. The domestic debt raised in place of external debt also contributed towards the increase in interest expense on domestic debt.

The interest expense on external debt was Rs. 475 billion, which is 115 percent higher as compared to interest expense on external debt in same period of preceding year. The reasons for this rise mainly include:

- i. Rise in global interest rates; and
- ii. Depreciation of Pakistani Rupee against US Dollar.

Interest payments on public debt in terms of debt servicing is presented in Table 9.5.

9.5 Domestic Debt

Domestic debt comprises of three main categories; (i) permanent debt (medium and long-term); (ii) floating debt (short-term); and (iii) unfunded debt (primarily made up of various instruments available under National Savings Schemes).

In line with the Public Debt Act, 1944 the Government issues three broad types of marketable securities for purpose of borrowing i.e., Treasury Bills (T-bills), Pakistan Investment Bonds (PIBs), and Government Ijara Sukuk (GIS).

- T-bills are short-term securities and have maturities of 12-Months or less at the time of issuance.
- PIBs are longer-term securities and have maturities of more than 12-Months at the time of issuance. PIBs pay the entire face value on maturity and also pay profits at regular intervals till maturity. PIBs can be further categorized as Fixed-rate PIBs and Floating-rate PIBs.

- Fixed-rate PIBs pay a fixed amount of profit on each profit payment date.
- Floating-rate PIBs pay a variable amount of profit on each profit payment date. The profit rate is based on reference rate such as 3- or 6- Month Tbills yield.
- Shariah-compliant Government securities program has also been in place since 2008-09. Government has carried out noticeable issuance through these securities in last few years with aim to increase the share of Shariah-compliant securities. In addition to existing 5 year Ijara Sukuk instrument, Government introduced 3 year and 1 year Ijara Sukuk instrument in January 2023 and February 2023 respectively. The target is to diversify shariah compliant instrument base and give more options to investors with appetite towards Islamic investments.

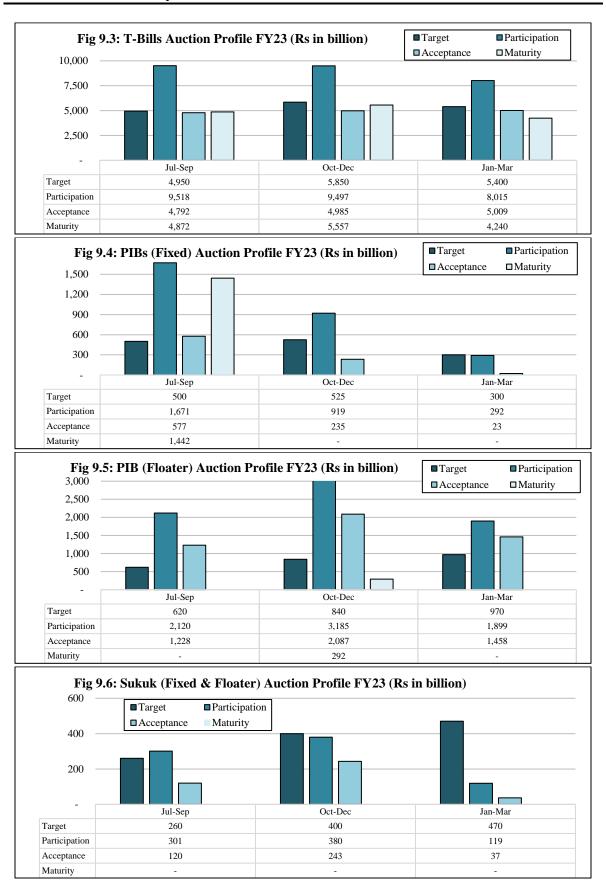

Table 9.6 lists down all Government securities instruments:

9.5.2 Domestic Borrowing Pattern

The auction patterns of Government securities is depicted in figures 9.3-9.6.

9.5.3 Component-Wise Analysis of Domestic Debt

This section highlights the developments in various components of domestic debt during the first nine months of the current fiscal year:

I. Permanent Debt

Permanent debt mainly comprises of medium to long-term instruments like PIBs, Government Ijara Sukuks (GIS), and Prize Bonds. Permanent debt constituted 71 percent of the domestic debt portfolio and was recorded at Rs. 24,885 billion at end-March 2023, representing an increase of Rs. 4,507 billion during the first nine months of the ongoing fiscal year. The bifurcation of this increase reveals that Government net mobilization through the issuance of PIBs and GIS was Rs. 4,096 billion² and Rs. 401 billion respectively.

II. Floating Debt

Floating debt was recorded at Rs. 6,295 billion or around 18 percent of the total domestic debt portfolio at the end-March 2023. During the first nine months of the ongoing fiscal year, a

reduction of Rs. 522 billion was witnessed in the stock of T-bills³.

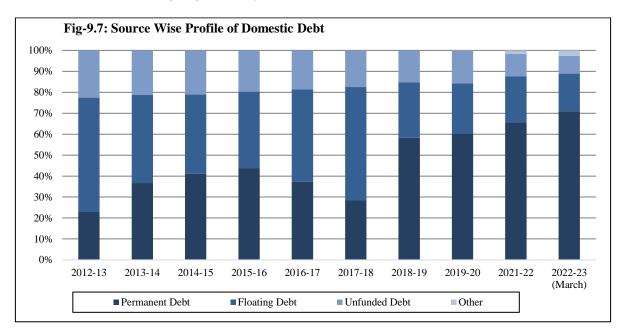

III. Unfunded Debt

The stock of unfunded debt stood at Rs. 2,998 billion at end-March 2023, constituting around 9 percent of the total domestic debt portfolio. Unfunded debt recorded a net reduction of Rs. 338 billion during the first nine months of the current fiscal year.

IV. Other

The other components of domestic debt comprises of following at end-March 2023:

- Naya Pakistan Certificates (held by residents only) amounted to Rs. 139 billion;
- ii. SBP on-lending to Federal Government against IMF Special Drawing Rights (SDRs) allocation amounted to Rs. 475 billion; and
- iii. Loans from banks other than securities amounted to Rs. 284 billion. This component refers to foreign currency denominated domestic debt.

Information related to outstanding public debt from FY2018 to March FY2023 is presented in Table 9.7.

² Excluding PIBs held by non-residents amounting to Rs. 1.0 billion, which are recorded as external public debt.

³ Excluding T-bills held by non-residents amounting to Rs. 0.041 billion, which are recorded as external public debt.

9.6 External Public Debt

External public debt was recorded at US\$ 85.2 billion at end-March 2023, revealing a decrease of around US\$ 3.7 billion during the first nine months of the current fiscal year. This decrease reveals the following:

- The debt stock of multilateral sources increased by US\$ 2.3 billion. The main gross inflows included US\$ 1.1 billion from IMF program, US\$ 1.5 billion from ADB's BRACE program, US\$ 1.1 billion from World Bank and US\$ 0.5 billion from AIIB. Overall, multilateral loans are mostly contracted on concessional terms;
- ii. Bilateral debt stock decreased by US\$ 0.9

billion;

- iii. The debt stock of commercial loans registered a net decrease of around US\$ 3.7 billion. The gross repayment to foreign commercial banks was US\$ 4.5 billion, out of which, US\$ 0.7 billion was refinanced by China Development Bank (CDB)⁴;
- iv. Government repaid US\$ 1.0 billion of international sukuk in December 2022;
- v. The stock of Pakistan Banao Certificates, Naya Pakistan Certificates, and non-resident investment in Government securities (T-bills & PIBs) cumulatively decreased by US\$ 0.4 billion.

Pakistan's external public debt is obtained from

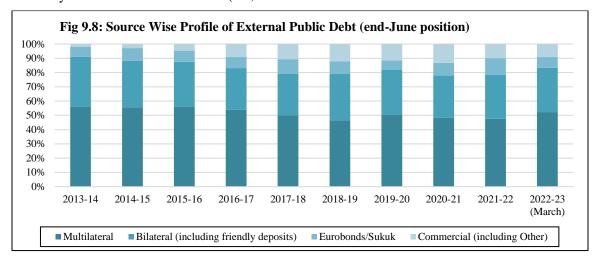

^{**} Represents foreign currency denominated domestic debt (loans from banks other than securities)

⁴ Another US\$ 1.0 billion was refinanced by ICBC China, which was recorded in domestic debt as foreign currency denominated domestic debt.

following major sources:

- Loans from multilateral development partners (including IMF) and bilateral countries constitute 52 percent and 23 percent, respectively. These loans are concessional in nature.
- ii. Friendly countries deposits (China and Saudi Arabia) account for 8 percent. These loans are short-term in nature (1-year) and are obtained for balance of payment as well as budgetary support.
- iii. Loans from foreign commercial banks constitute around 8 percent. These loans are mostly short-to-medium term (i.e., 1-3

- years) with market-based interest rate.
- iv. Government of Pakistan's international capital market transactions in form of Eurobonds and international sukuk constitute 9 percent. These transactions represent long-term debt with market-based interest rate.
- v. Other foreign inflows in terms of Naya Pakistan Certificate, non-resident investment in Government securities, and Pakistan Banao Certificates etc. constitute around 1 percent. This category falls under medium-to-long term debt with market-based interest rate.

External debt profile for the period FY2018 to March-FY2023 is presented in Table 9.8.

9.6.1 External Public Debt Inflows and Outflows

(a) Inflows

Gross external loan disbursements were recorded at US\$ 7,032 million⁵ during the first nine months of FY23. Details are given below:

- Disbursements from multilateral sources amounted to US\$ 5,137 million and accounted for 73 percent of the total disbursements. The main contributors were Asian Development Bank (ADB) US\$ 1,939 million, World Bank US\$ 1,218 million, and IMF US\$ 1,166 million;
- Bilateral sources contributed US\$ 995 million or 14 percent in total disbursements.
 Out of this, the Saudi Oil Facility constituted around US\$ 883 million;
- Commercial loans contributed US\$ 900 million in total disbursements⁶, mainly representing refinancing of commercial loans.

(b) Outflows

External public debt repayments were recorded at US\$ 11,400 million during the first nine

months of FY23 as compared with US\$ 8,139 million during the same period last year. This increase in repayments is primarily due to (i) resumption of debt repayment to bilateral creditors, which were deferred under Debt Service Suspension Initiative (DSSI), (ii) US\$ 1,000 million International Sukuk maturity in Dec 2022, and (iii) higher repayment of commercial loans i.e., bank loans and other short-term credits.

Interest payments were recorded at US\$ 2,119 million during the first nine months of FY2022 as compared to US\$ 1,297 million during the same period of the preceding year. The main factors which increased the external interest servicing during the ongoing fiscal year were (i) resumption of interest payments to bilateral creditors in the third quarter of FY2022, which were deferred under DSSI, (ii) increase in global interest rates, leading to resetting of floating rate external debt at higher rate, and (iii) higher interest servicing against commercial loan portfolio and Eurobonds. The source wise details of external public debt inflows and outflows over the last few years are depicted in Table 9.9:

Table 9.9: Source Wise External Public Debt Inflows and Outflows (US\$ million)

⁵ Excluding disbursement from Pakistan Banao Certificates, NPCs and non-resident investment in Government securities.

⁶ US\$ 700 million represents refinancing of FY23 maturity and US\$ 200 million represents refinancing of FY22 maturity.

9.6.2 Impact of Exchange Rate Fluctuations

External loans are contracted in various currencies: however. disbursements effectively converted into Pak Rupee. Since Pak Rupee is not an internationally traded currency, other international currencies are bought and sold via selling and buying of the US Dollar. Hence, the currency exposure of foreign debt originates from two sources: US Dollar/other foreign currencies and Pak Rupee/US Dollar. Thus, any movement in international currencies (in which debt is contracted) and PKR vis-à-vis US Dollar can change the Dollar and Pak Rupee value of external debt respectively. It must, however, be taken into account that domestic debt does not carry currency risk since it is denominated in Pak Rupee.

In addition to net external inflows, the following factors influenced the movement in external public debt stock during the first nine months of the current fiscal year:

- In US Dollar terms, revaluation losses owing to depreciation of the US Dollar against other international currencies increased the external public debt stock by around US\$ 470 million. This increase was mainly driven by depreciation of the US Dollar against Euro by 4 percent, Japanese Yen by 2 percent, Pound Sterling by 2 percent, and Special Drawing Right (SDR) by 1 percent;
- The above-mentioned translational loss on account of the depreciation of the US Dollar against other international currencies added further to the depreciation of the Pak Rupee against US Dollar by around 39 percent which led to increase the Rupee value of external debt by around Rs. 6.8 trillion.

9.7 Way Forward

The Government's strategy to reduce its debt burden to a sustainable level includes commitment to run primary budget surpluses, maintain low and stable inflation, promote measures that support long-term sustainable economic growth and follow an exchange rate regime based on economic fundamentals. Additionally, the Government is also committed

to ensure fiscal discipline through revenue mobilization and expenditure rationalization and maintain debt sustainability over the medium term. With a narrower fiscal deficit, public debt is projected to enter a firm downward path while the Government's efforts to improve maturity structure and expansion of debt instruments-base would help to meet the financing requirements efficiently.
